V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. statement

Novelty (N)	Claims	<u>8-21</u>	YES
	Claims	<u>1-7</u>	NO
Inventive Step (IS)	Claims	<u>8-21</u>	YES
	Claims	<u>1-7</u>	NO
Industrial Applicability (IA)	Claims	<u>1-21</u>	YES
	Claims	<u>NONE</u>	NO

2. citations and explanations

Claims 1-7 lack novelty under PCT Article 33(2) as being anticipated by Mullane.

With respect to claims 1-7 Sitoto discloses a connector device adapted for use with an anchoring shaft, comprising a shank (FIG 1) having first and second ends; the first end having a securing mechanism (11), and the second end comprising a hollow core, and a central aperture (12) operatively associated with the hollow core, the hollow core sized for receiving an anchoring shaft head (20).

With respect to claims 2-7; Sitoto discloses all the limitations as best seen in the Figures.

Claims 8-21 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a surgical implant assembly and a method thereof, comprising a connecting link having a connecting end with an anchoring shaft cavity the connecting link secured to the connector device by an anchoring shaft nut on the distal end of the anchoring shaft.
